

EST. 2020 · SOFTWARE STUDIO & SECURITY · REMOTE, WORLDWIDE

Sell software that ships, and earn on every single deal.

Put a full senior software studio behind your brand. We design, build and secure custom software end to end, you keep the client and earn **5% on every sale**. Fully white-label. Zero engineering risk on your side.

5% on every sale

● Full white-label

● 10 services & verticals to sell

● Security-first delivery

5%

A studio behind your brand, not an agency in front of it.

Innovation Rise Solutions is an independent, remote-first, AI-native software studio working with clients worldwide. We design, build and secure custom software end to end, and we specialize in securing applications built with AI coding tools ([Cursor](#), [Claude](#), [Lovable](#), [Bolt](#), [v0](#)) before they reach production. The same small senior team scopes, writes, secures and ships every project. No middlemen, no outsourced developers, no organizational entropy, which is exactly why we can sit invisibly behind *your* brand and still deliver work you're proud to put your name on.

 48– 72h VIBE AUDIT DELIVERY	 0 CVE LEFT OPEN AFTER FIX	 100% CLIENT OWNS THE CODE · ZERO LOCK-IN	 Weekly RELEASES THE CLIENT CAN USE
---	---	---	--

01 Discovery We map the real problem and the fastest path to value. A clear scope you, and your client, can sign off on.	02 Build We design and write the software ourselves, in weekly releases. Real progress every week, not a yearly promise.	03 Secure Every endpoint, input and credential reviewed and hardened before anything reaches production.	04 Ship & own The client walks away with the code, the infrastructure and the keys. Documented. Zero lock-in.
--	--	--	---

You bring the client. We do the rest. **You get paid.**

STEP 01

Refer or resell

Introduce a client who needs software built or secured, or sell our full catalogue under your own brand. Either way, you own the relationship.

STEP 02

We build & secure

Our senior team delivers end to end, white-label, behind your name. Weekly releases, security by default, full handover. You stay in the loop, not in the code.

STEP 03

You earn 5%

You take 5% of every sale to the end client, on every project, every service. Resell white-label and you keep your own markup on top.

5%

Commission on every sale to end clients

Paid on the value of every project we deliver through you, first engagement and repeat work alike. There's no cap and no minimum volume. Working white-label? Set your own price and keep the difference: your margin **plus** our 5% on top.

Referral partner

Introduce the client and hand them over. We scope, close and deliver, under our name or yours, and you collect **5%** of the contract value with zero delivery work.

White-label reseller

Keep the client fully yours. We deliver invisibly behind your brand, your logo, your proposals, your relationship. You price freely and earn your markup **plus** our 5%.

Security & software services

Our specialty: securing applications built with AI tools, then building the software around them. Every engagement is fixed-scope and report-backed.

Vibe Audit

Security review for apps built with AI coding tools, before they hit production.

- Full vulnerability report with severity ratings
- Exposed secrets & credential scan
- Auth, CORS & rate-limit review
- Delivered in 48–72 hours

Security Assessment

In-depth, full-stack security audit of the application and its infrastructure.

- Application threat model
- OWASP Top 10 test results
- Auth & secret-management review
- Severities, PoC & remediation roadmap

Security Fixing

We close the vulnerabilities an audit finds, directly in the client's codebase.

- Fixes implemented in the repo
- Hardened auth & patched dependencies
- Regression tests for each fix
- Re-test confirming zero open findings

Rise CRM

A custom CRM built around the client's sales process, not the other way around.

- Custom data model & pipeline
- Real-time reporting dashboards
- Workflow automations & RBAC
- Integrates with the existing stack

AI Automations

End-to-end automations and AI agents that cut hours of manual work every week, invoicing, lead handling, reporting, support triage, data sync. Hard to break: idempotent webhooks, retries and monitoring, with LLM steps used precisely where they add value.

- Mapped automation opportunities
- AI / LLM steps where they help
- End-to-end workflows across every tool
- Monitoring, error handling & handover

Platforms & bespoke builds

Higher-ticket, end-to-end products. Ideal for partners with clients in fintech, iGaming, e-commerce or anyone who's outgrown off-the-shelf tools.

Prop Trading

End-to-end infrastructure for prop trading firms.

- MT4/MT5 & broker integration
- Challenge / evaluation engine
- Real-time risk & drawdown
- White-label trader area & payouts

Prop Betting

Funded-account and betting platforms, built end to end.

- Multi-bookmaker odds aggregation
- Bet tracking & ROI analytics
- Funded-account rules & payouts
- Fraud detection & KYC

Custom Software

Bespoke software for problems off-the-shelf tools can't solve.

- Architecture & technical plan
- MVP or full enterprise build
- Security review & hardening
- Full handover, the client owns it

Growth & Commerce

Performance-first commerce, tracking & Merchant-of-Record setups.

- Merchant-of-Record integration
- High-converting landing pages
- Server-side pixels & Conversion API
- Multi-channel tracking & attribution

API Integrations

Secure integration of payment processors and third-party APIs, Stripe, Adyen, Checkout.com, Mollie and crypto, with idempotent webhooks, multi-processor fallbacks, and proper handling of disputes, chargebacks and refunds.

- Payment processor integration
- Multi-processor fallback strategy
- Idempotent, verified webhooks
- PCI-SAQ friendly flows

Built for people who already have the **clients.**

Agencies & studios

Design, web or marketing agencies that get asked for things they can't build in-house.

Consultants & freelancers

Advisors and freelancers who want to offer build & security work without hiring engineers.

IT providers & MSPs

Add custom development, audits and remediation to an existing managed-services book.

Communities & creators

Audiences in fintech, prop trading, iGaming or SaaS who need real product built.

Sales & biz-dev pros

People with a network and a phone. Introduce, we close, you earn, no delivery on you.

Prop & iGaming operators

Operators and brokers who want a platform partner to build the infrastructure behind them.

● WHAT 5% LOOKS LIKE

EXAMPLE SALE	CONTRACT VALUE	YOUR 5%
Vibe Audit	€1,500	€75
Security assessment + fixing	€8,000	€400
Custom CRM build	€20,000	€1,000
Prop-trading platform	€60,000	€3,000

Figures are illustrative. Project pricing is scoped per engagement; white-label markups are yours to keep on top.

● PROGRAM TERMS

- > **5% commission** on the net value of every sale to your end clients.
- > **No cap, no minimums.** First project and repeat work both count.
- > **Leads are attributed to you** once registered, the relationship stays yours.
- > **White-label by default**, under a mutual NDA whenever you want it.
- > **Paid after the client's payment clears**, per milestone or in full.
- > Final terms are confirmed in a simple one-page partner agreement.

The practical bits

Do I need to be technical?

No. You bring the client and the relationship; we handle every line of code, the security and the delivery. You stay informed, never in the weeds.

Can I use my own brand?

Yes, white-label is the default. Your logo, your proposals, your client portal if you want one. We can stay completely invisible under a mutual NDA.

Who owns the client?

You do. Registered leads are attributed to you, and we never go around you. Repeat work through the same client keeps paying your 5%.

When and how am I paid?

After the client's payment clears, per milestone or in full. Bank transfer or your preferred method, in EUR or USD.

Is there a cost to join?

None. No fee, no minimum volume, no exclusivity. Refer one project a year or build a whole resale line, both work.

How fast can we start?

A 30-minute call, a one-page agreement, and you can introduce your first client the same week. Quotes typically come back within days.

● BECOME A PARTNER

Let's set up your 5%.

Book a 30-minute partner call and we'll map exactly what you can sell, to whom, and how the white-label flow works for your clients.
